

# Casing Crew Technician

## Position Responsibilities:

As a Casing Crew Technician, you will play an important role in the exploration, delineation, development, and production of uranium resources in Wyoming. Working closely with the Drilling Supervisor, you will ensure that the proper casing and well completion materials are delivered to well site locations, assist with the movement of drill contractors, cementing of wells, and conduct other well field development activities.

- Deliver casing, screen, centralizers, cement tubs, cement heads, cementers, and sand to rigs as needed to case and complete wells for uranium production and monitoring.
- Assist the Lead Casing Technician with the cementing of wells and topping off wells with cement as needed.
- Tracking and recording the amount of casing, screen, centralizers, etc. used by each rig on each well.
- Assist the Drilling Supervisor with inventory maintenance and notifying drilling supervisor when materials are needed.
- Offloading materials delivered to project site.
- Learn to run MIT (mechanical integrity test) and geophysical logging units.
- Perform regular maintenance of all equipment to keep it running in proper working order.
- Adherence to safety, environmental regulations, and company standards. Must be able to recognize hazardous conditions and follow company safety policies and practices and engage in a strong safety culture.

## Job Requirements

- The ability to work outdoors in varying weather conditions.
- Applicants must be legally authorized to work in the U.S.
- A valid driver's license is required.
- The successful candidate will be required to submit to mandatory drug and alcohol testing prior to employment.

## Qualifications:

- Minimum of High School education with 0-5 years' experience in construction or energy related field.
- Must be able to work outside in varying weather conditions and able to lift over 50 pounds.
