

## **Junior Geologist**

UEC is seeking a curious and motivated **Junior Geologist** to join our team. In this role, you will work with our Saskatoon-based Exploration team to advance our portfolio of Uranium projects in northern Saskatchewan. You will participate in and contribute to exploration programs through a combination of office and field-based work. During active exploration programs, field work is completed on a rotational schedule.

### **Responsibilities:**

- Engage in and supervise geological work including core logging, sampling, and QAQC to ensure best practices are maintained
- Create and digitize cross-sections and maps
- Collect and process reflectance spectroscopy data
- Complete downhole probes with geophysical tools
- Spot drill collars and trails
- Conduct safety inspections around the Project(s)
- Assist with geological compilations, interpretations, and reporting of geological data
- Other field duties as assigned by the Project Geologist.

In addition, there is opportunity to work on geoscience-focused initiatives as time permits throughout the year.

### **Requirements:**

- Bachelor's degree in geology, or equivalent, and eligible for registration with APEGS
- Comfortable working in remote locations for extended periods of time
- Proficient in Microsoft Office applications
- Strong communication, interpersonal and analytical skills
- Eager to work in a team environment
- Valid Class 5 driver's licence

**Recommended:**

- First Aid, ATV and/or snowmobile training
