

# Logging Technician

## Position Responsibilities:

As a Geophysical Logging Technician, you will be responsible for conducting downhole geophysical logging and maintaining detailed data records for an active in-situ recovery (ISR) uranium mine in Wyoming. This role plays a crucial part in monitoring well performance, guiding production operations, and ensuring accurate subsurface data collection for geological and hydrological analysis. The technician will work closely with geologists and mine operators to optimize wellfield operations, and support the environmental and safety standards of the mine. Specific responsibilities include, but are not limited to:

- Perform geophysical logging of exploration, production, and injection wells using advanced downhole logging tools (e.g, gamma, resistivity and other pertinent methods) in a timely manner.
- Calibrate, troubleshoot, and conduct periodic maintenance of logging equipment to ensure accuracy and reliability of data to meet industry and regulatory standards.
- Ensure all operations comply with regulatory requirements, environmental standards, and mine health and safety policies.
- Maintain detailed and organized records of all logging activities. Prepare and submit daily, weekly, and monthly logging reports to geologists and mine sites.
- Assist in monitoring wellfield performance through routine logging, data analysis, and troubleshooting.
- Provide field support during well installation, completion, and abandonment phases as required. This may include delivering casing/cementing materials, or any other duties requested by the Drilling Supervisor.

## Job Requirements

- This is an hourly position that involves working outdoors in varying weather conditions.
- Ensure compliance with environmental regulations and best practices in all work-related activities.
- Must be able to recognize hazardous conditions, follow company safety policies and practices and to engage in a strong safety culture.
- Strong analytical skills and attention to detail for accurate data collection.
- Excellent communication skills to collaborate with interdisciplinary teams.
- Applicants must be legally authorized to work in the U.S.
- A valid driver's license is required.
- The successful candidate will be required to submit to mandatory drug and alcohol testing prior to employment.

## Qualifications:

- A High School Education with 0-5 years of experience.
- Must be able to lift at least 50 lbs.
- Must be willing to work almost entirely outdoors and at multiple project sites.
- Knowledge of Microsoft Office, Word and Excel is helpful.
